## ADMINISTRATION

- JAMES A. PERKINS, A.B., Ph.D., President of the University.  
CHARLES EDMUND PALM, Ph.D., Dean of the College of Agriculture and Professor of Entomology.  
ARTHUR HOWARD PETERSON, M.A., Controller of the University, and Professor in Business Administration.  
DONALD WILBER BARTON, Ph.D., Director of the New York State Agricultural Experiment Station, Assistant Director of Research, New York State College of Agriculture, and Professor of Vegetable Crops.  
ALVIN AUGUST JOHNSON, M.S., Director of Extension and Professor of Plant Breeding.  
WILBERT KEITH KENNEDY, Ph.D., Director of Research, Director of the Cornell University Agricultural Experiment Station, and Professor of Agronomy.  
KENNETH LEROY TURK, Ph.D., Director of International Agricultural Development, and Professor of Animal Husbandry.  
ROBERT LEO WALSH, M.A., Director of Finance.  
THOMAS COBB WATKINS, Ph.D., Director of Resident Instruction and Professor of Economic Entomology.  
ARTHUR EDSON DUFFEE, Ph.D., Associate Director of Extension and Professor in Extension Service.  
CLIFFORD RAMON HARRINGTON, M.S., Associate Director for Programs and Professor in Extension Service.  
JOSEPH FRANK METZ, JR., Ph.D., Assistant Director of Research, Assistant Director of the Cornell University Agricultural Experiment Station and Associate Professor of Marketing.  
JOHN PARKER HERTEL, Ph.D., Professor in Personnel Administration and Secretary of the College.  
LEIGH H. HARDEN, M.S., Professor in Personnel Administration in Charge of Admissions.  
SANFORD REUBEN SHAPLEY, B.S., Professor in Personnel Administration in Charge of Student Practice.  
HOWARD STYRING TYLER, Ph.D., Professor in Personnel Administration in Charge of Vocational Guidance and Placement.  
WHITON POWELL, Ph.D., Professor of Business Management and Librarian.

## STAFF OF INSTRUCTION

- ROBERT CARL BAKER, Ph.D., Professor of Poultry Husbandry.  
HARLAN PARKER BANKS, Ph.D., Professor of Botany.  
CARL WILLIAM BOOTHROYD, Ph.D., Professor of Plant Pathology.  
KENDALL SEWELL CARPENTER, Ph.D., Associate Professor of Business Management.  
ROBERT LLOYD CARROLL, Ph.D., Assistant Professor of Rural Sociology.  
JOHN FARNSWORTH CORNMAN, Ph.D., Professor of Ornamental Horticulture.  
LAWRENCE BRYCE DARRAH, Ph.D., Professor of Marketing.  
BENNETT AVERY DOMINICK, JR., Ph.D., Professor of Marketing.  
ELTON JAMES DYCE, Ph.D., Professor of Apiculture.  
LOUIS JAMES EDGERTON, Ph.D., Professor of Pomology.  
MRS. ANN M. ELLIOT, B.F.A., Assistant Professor of Freehand Drawing.  
JOHN MURRAY ELLIOT, Ph.D., Assistant Professor of Animal Husbandry.

ROBERT HUTCHINSON FOOTE, Ph.D., Professor of Animal Husbandry.  
RAYMOND THOMAS FOX, Ph.D., Associate Professor of Floriculture.  
CHESTER HIGBY FREEMAN, M.S.A., Associate Professor of Extension Teaching.  
DANA CLEMENT GOODRICH, JR., Ph.D., Assistant Professor of Marketing.  
DONALD JAMES HALL, Ph.D., Assistant Professor of Biology.  
JOHN HARP, Ph.D., Assistant Professor of Rural Sociology.  
JOHN DANIEL HARTMAN, Ph.D., Professor of Vegetable Crops.  
HERBERT BERTSCH HARTWIG, Ph.D., Professor of Field Crops.  
MELVIN BUTLER HOFFMAN, Ph.D., Professor of Pomology and Head of the Department.  
DOUGLAS E. HOGUE, Ph.D., Associate Professor of Animal Husbandry.  
JOHN WILLIAM INGRAM, JR., Ph.D., Associate Professor of Botany.  
ROBERT JOHN LAMBERT, M.S., Assistant Professor of Freehand Drawing.  
ROBERT WING LAGLANS, Ph.D., Associate Professor of Floriculture.  
DOUGLAS J. LATHWELL, Ph.D., Professor of Soil Science.  
FRED GEORGE LECHNER, D.Ed., Assistant Professor of Agricultural Engineering.  
ROBERT THEODORE LORENZEN, M.S., Assistant Professor of Agricultural Engineering.  
DAVID CORBIN LUDINGTON, M.S., Assistant Professor of Agricultural Engineering.  
EDWARD ALBERT LUTZ, Ph.D., Professor of Public Administration.  
DEAN RICHMOND MARBLE, Ph.D., Professor of Poultry Husbandry.  
RUSSELL DICKINSON MARTIN, M.S., Associate Professor of Extension Teaching.  
WILLIAM GEORGE MERRILL, Ph.D., Assistant Professor of Animal Husbandry.  
JOHN IVAN MILLER, Ph.D., Professor of Animal Husbandry.  
WILLIAM FREDERICK MILLER, Ph.D., Associate Professor of Agricultural Engineering.  
OSCAR GORTON MINK, D.Ed., Assistant Professor of Secondary Education.  
ROGER ALFRED MORSE, Ph.D., Associate Professor of Apiculture.  
ROBERT GLENN MOWER, Ph.D., Assistant Professor of Ornamental Horticulture.  
ARTHUR LESLIE NEAL, Ph.D., Associate Professor of Biochemistry.  
MALDEN CHARLES NESHEIM, Ph.D., Assistant Professor of Animal Nutrition and Poultry Husbandry.  
WILSON GIDEON POND, Ph.D., Associate Professor of Animal Husbandry.  
EDGAR MERROW RAFFENSPERGER, Ph.D., Associate Professor of Economic Entomology.  
WILLIAM WOODLAND REEDER, Ph.D., Associate Professor of Rural Sociology.  
GERALD EDWIN REHKUGLER, M.S., Assistant Professor of Agricultural Engineering.  
ROBERT JOHN SCANNELL, M.L.A., Associate Professor of Ornamental Horticulture.  
RAYMOND SHIELDRAKE, JR., Ph.D., Associate Professor of Vegetable Crops.  
DANIEL GENE SISLER, Ph.D., Assistant Professor of Agricultural Geography.  
ORA SMITH, Ph.D., Professor of Vegetable Crops.  
SEWDICK EUGENE SMITH, Ph.D., Professor of Animal Husbandry.  
ROBERT MUMFORD SMOCK, Ph.D., Professor of Pomology.  
ROBERT PRINDLE STORY, Ph.D., Professor of Marketing.  
JAMES RAY STOUFFER, Ph.D., Associate Professor of Animal Husbandry.  
ROBERT DEAN SWEET, Ph.D., Professor of Vegetable Crops.  
JOHN PRESTON TOMKINS, Ph.D., Associate Professor of Pomology.  
GEORGE WILLIAM TRIMBERGER, Ph.D., Professor of Animal Husbandry.  
PAUL JOHN VANDEMARK, Ph.D., Professor of Bacteriology.  
RICHARD GRISWOLD WARNER, Ph.D., Professor of Animal Husbandry.  
STANLEY WHITSON WARREN, Ph.D., Professor of Farm Management.  
MADISON JOHNSTON WRIGHT, Ph.D., Associate Professor of Agronomy.

# THE NEW YORK STATE COLLEGE OF AGRICULTURE—TWO-YEAR COURSE

---

THE New York State College of Agriculture, a contract college of the State University of New York, is maintained by the state as one of four state colleges or schools within Cornell University. It is equipped with a staff and facilities to teach resident students, to make investigations in all phases of agriculture and the underlying sciences, and to disseminate its teachings to the people of the state. The support of the state toward these ends is supplemented by substantial appropriations from the federal government, and by land and other facilities and services placed at the disposal of the College by Cornell University.

## GENERAL INFORMATION

### THE COURSES AVAILABLE

The information contained in this Announcement relates to the two-year course. This course is designed for young men who expect to go into farming or into business closely allied thereto, and who desire agricultural training of college grade, but whose current needs are best met through a two-year curriculum. The College offers, in addition, a summer session of six weeks; a four-year course, leading to the degree of Bachelor of Science; and graduate courses, leading to higher degrees. These offerings give preparation for different kinds and different levels of agricultural vocations and call for different prerequisites for admission. A separate printed Announcement of each of these courses is available on application to the Secretary of the College of Agriculture, Roberts Hall, Ithaca, New York.

## REQUIREMENTS FOR ADMISSION

For admission to the two-year course, candidates must offer:

*Sixteen units* acceptable to Cornell University in subjects credited by the University of the State of New York toward a state diploma, or in the case of applicants whose secondary-school training has been outside New York State, the equivalent by school certificates. It is recommended, but not required, that three or more units be in mathematics.

*The scholastic aptitude test* of the College Entrance Examination Board. The scores submitted must be for a test taken within one year prior to the date of anticipated matriculation. (While not required for admissions consideration, the Writing Sample administered by the College Board is required of students who are accepted and decide to enter the College of Agriculture. Many candidates will probably wish to meet this requirement on the same College Board testing date selected for taking the scholastic aptitude test.)

*Approximately one year* of practical experience on a farm or in a business related to the curriculum to be followed.

*Certifications regarding personal health* which meet the health requirements adopted by the Board of Trustees of Cornell University. Details of the health requirements and the health services may be found in the *Announcement of General Information*, obtainable by writing to the Announcements Office, Day Hall.

### THE APPLICATION FOR ADMISSION

Candidates for admission should address the Director of Admissions, Day Hall, Ithaca, New York, stating that they desire to enter the two-year course in the College of Agriculture. This should be done as early as possible in the senior year of secondary school, because it often takes considerable time to assemble the necessary credentials. Applicants are not required to come to the College for interviews, but those who wish to do so should write two or three weeks in advance for appointments. Conference hours are 10 a.m. until 12 noon during the week and 9 a.m. until 12 noon on Saturdays during the school year. The College office is closed on Saturdays during June, July, and August.

### CERTIFICATION ON COMPLETION OF COURSE

Students who satisfactorily complete the work of an approved two-year course with credit for at least sixty semester hours will be granted an appropriate certificate.

### RELATION TO FOUR-YEAR COURSE

Except in respect to the items of administration and curriculum specifically covered in this Announcement, students in this course are governed by exactly the same conditions as are students of the four-year course. They should, therefore, consult the Announcement of the latter course for further details of information and for the description of courses open to their election but not here listed or described.

Transfer to the degree course will be possible at the end of one of these curricula for those who have given evidence of ability to carry advanced work. Students who qualify for such transfer will not be required to offer any further entrance credit. The transfer is possible solely on a basis of the record and on completion of the curriculum. The record must be considerably better than average. Students who transfer to the four-year course are given full credit toward the degree for courses passed in the two-year course.

Two-year students are registered as special students and are not eligible to represent the University in intercollegiate athletics.

## EXPENSES

## TUITION

Tuition is \$200 per term for students in the New York State College of Agriculture, who at the time of their matriculation are, and for at least twelve months prior thereto have been, bona-fide residents of the State of New York. Since physical presence in the State, especially for persons under age, does not necessarily constitute legal residence, applicants who are at all doubtful of their right to qualify as New York State residents should address inquiries in advance to the Director of Resident Instruction in the College of Agriculture. A student transferring from one college or course in the University to another must pay, for the hours' credit he receives in the latter college or course, an amount corresponding to the difference in tuition, and no such transfer is allowed or credit given until such payment has been made.

Students in agriculture who do not qualify as New York State residents are required to pay tuition of \$300 a term. Tuition and other fees become due when the student registers. The University allows a period of grace after the last registration day of each term of the regular session. The last day of grace is printed on the bill for tuition and fees which the student is required to present at the Treasurer's office. Any student, graduate or undergraduate, who fails to pay his tuition, fees, and other indebtedness within the time prescribed is dropped from the University. When, in his judgment, the circumstances in a particular case so warrant, the Treasurer may allow an extension of time to complete payments. For such extension, the student will be assessed a fee of \$5. A reinstatement fee of \$10 is assessed to any student who is permitted to continue in or return to classes after being dropped from the University for default in payments. For reasons satisfactory to the Treasurer and the Registrar, which must be presented in writing, the latter assessment may be waived in any individual case. If the student withdraws, University fees are charged on the basis of 10 per cent for each week or fraction thereof in attendance.

*The amount, time, and manner of payment of tuition, fees, or other charges may be changed by the Board of Trustees at any time without notice.*

## FEES AND INSTRUCTIONAL EXPENSES

*A DEPOSIT OF \$45* must be made after the applicant has received notice of provisional acceptance. At the time of the first registration in the University, the deposit is used to cover matriculation charges. It also provides for certain graduation expenses, and establishes a fund for undergraduate and alumni class activities. The deposit is not refundable and none of it applies toward tuition or fees.

A *DEPOSIT OF \$30* is required for a uniform, payable at registration in the first term, for students who enroll in the basic course in military science. Most of this deposit is returned as earned uniform allowance upon completion of the basic course.

A *GENERAL FEE OF \$50* for New York State residents, and \$150 for nonresidents, is required at the beginning of each term. This fee and the tuition cover the following services: (1) *Health services and medical care.* These services are centered in the University Clinic or out-patient department and in the Sage Hospital. For details regarding services that are provided, including charges for special services, see the *Announcement of General Information.* (2) *Willard Straight Hall membership.* Willard Straight Hall is the student union; each student shares in the common privileges afforded by the operation of Willard Straight Hall, subject to regulations approved by the Board of Managers of the Hall. (3) *Laboratory services* for courses taken in the state colleges. (4) *University administration and endowed college laboratory services.* (5) *Physical recreation.* Each male student is entitled to the use of the gymnasium and the university playgrounds, and to the use of a locker, bathing facilities, and towels in Teagle Hall, Barton Hall, or the Schoellkopf Memorial Building; and each woman student to the use of the facilities in Helen Newman Hall, the women's physical education and sports building. (6) *Student activities.* The fee helps to provide funds for worthy student organizations as approved by the Board of Trustees on recommendation of the Executive Board of the Cornell Student Government.

*Books, instruments, and instructional supplies* may cost from \$25 to \$50 a term.

#### MISCELLANEOUS RULES AND ASSESSMENTS

Every student is held personally responsible for any injury done by him to any of the University's property.

Assessments, charged to the student's account and payable at the Treasurer's office, are levied upon the student in certain circumstances, under the following rules of the University: (1) A matriculated student desiring to register after the close of registration day must first pay a fee of \$10; (2) a student desiring to take an examination or other test for the completion of a course in which the grade "absent" or "incomplete" was reported must first pay a fee of \$2 for each examination or other test.

For reasons satisfactory to the proper authority, any of the above-mentioned assessments may be waived in any individual case if the student's failure to comply with the regulation was due to ill health or to any other reason beyond his control. Application for such a waiver should be made to the Secretary of the College.

# STUDENT HOUSING AND DINING

---

## UNDERGRADUATE STUDENTS

*MEN . . .* Cornell University provides, on the campus, dormitory facilities for about 2100 men. Complete cafeteria and dining service is provided in Willard Straight Hall, Noyes Lodge, Baker Cafeteria, Martha Van Rensselaer Cafeteria, and Stocking Hall (Dairy Bar) Cafeteria. Male students are not required to live in dormitories and are individually responsible for making their own living and dining arrangements. As a matter of convenience for those who wish to live in dormitories, application forms will be mailed to each male candidate for admission as a freshman or a transfer student at the time of notification of provisional acceptance to the University.

Housing in dormitories can be guaranteed for all undergraduate men who have been admitted to the University and have filed dormitory applications by May 15.

Off-campus housing may be obtained in private homes and rooming houses. The University, as a service to students, maintains a listing of available rooms, and apartments. Inquiries should be addressed to the Off-Campus Housing Office, Day Hall.

*WOMEN . . .* The University provides dormitories for the housing of undergraduate and graduate women. These residence units are supplemented by sorority and cooperative houses close to the dormitories. With few exceptions all undergraduate women students are required, under University policy, to live and take their meals in a University residential unit or in a sorority house (for members only). Permission to live elsewhere in Ithaca is granted only under exceptional circumstances upon written application to the Office of the Dean of Students, Day Hall.

An application form for living accommodations for undergraduate women will be sent with the notice of provisional acceptance from the Office of Admissions to each candidate.

Graduate women should make application for University dormitory housing directly to the Department of Housing and Dining Services.

## MARRIED STUDENTS

The University, through the Department of Housing and Dining Services, maintains apartment accommodations for some of its married students and their families. These are Cornell Quarters, Pleasant Grove Apartments, and Hasbrouck Apartments, with total housing for about 400 families. All apartments are unfurnished. For further information and application, write the Department of Housing and Dining Services, Day Hall.

The Department of Housing and Dining Services also maintains a list of available rental housing in the Ithaca area. Information on housing currently available can be obtained only at the Off-Campus Housing Office in Day Hall. Lists cannot be sent out as changes occur daily.

### THE CURRICULA

The two-year course has organized within it seven curricula giving preparation for the major types of farming in New York State and for certain allied business. A two-year student must select one of these curricula and follow closely the work outlined. Changes from these outlines may be made with the consent of the Director of Resident Instruction and the faculty adviser to whom the student will be assigned when he registers. All two-year students must register for physical education. Material describing courses in this field will be made available to entering students by the Department of Physical Education.

Requests for further information regarding the seven curricula, described in the pages following, should be addressed to Professor L. H. Harden, in charge of admissions in the College of Agriculture, Roberts Hall, Ithaca, New York.

## CURRICULUM IN DAIRY FARMING

## DESCRIPTION OF COURSES

---

THE COURSES described in the following pages are those required or suggested for one or more of the preceding curricula. They are given by members of the staff of the College of Agriculture.

The administrative units of the College in charge of the various subject-matter fields are called *departments*. The work given in several of the departments is not required in these curricula, but the courses offered by them may be elected as time permits and if the prerequisites are met. For the description of these offerings, reference should be made to the Announcement of the four-year courses.

The arrangement of the courses in the foregoing curricula is such that two-year students will be admitted if the courses are taken in the order in which they are listed. One should consult the four-year Announcement for course prerequisites before making any change in the order of schedule.

A new system of numbering of courses is being initiated in the College of Agriculture. In order to avoid confusion in identifying courses, the old numbers are given in parentheses. Students should register for courses only under their new numbers.

### ORIENTATION

5. *ORIENTATION*. Spring term. M W F 11. Warren 160. Dr. ———.

Emphasis on the analysis and reasoning involved in the solution of work problems which have been drawn mainly from College of Agriculture courses requiring the use of mathematics.

### AGRICULTURAL ECONOMICS

150. (50.) *AGRICULTURAL GEOGRAPHY*. Fall term. Credit four hours. Lectures, M W F 9, Warren 45, or M W F 11, Warren 131. Discussion, W Th or F 2-4 or W 7-9 p.m. Warren 345. Assistant Professor SISLER.

The economics and geography of the world's agriculture, providing a basis for understanding past development and future changes in agriculture. Elementary economic principles, historical development, physical geography, and population growth are studied in their relation to agricultural development and to the economic problems of farmers. Particular emphasis is placed upon study of the agriculture of various farming regions of the United States, their economic problems and competitive situation.

221. (121.) *ACCOUNTING*. Fall term. Credit three hours. Lectures, M F 10. Warren 45. Laboratory, T or Th 8-10; M T W or Th 2-4. Warren 201. First class of term on Friday. Associate Professor CARPENTER.

A comprehensive survey of basic accounting principles. Some analysis and interpretations of financial statements with special emphasis on agricultural businesses.

222. (122.) *ACCOUNTING*. Spring term. Credit three hours. Prerequisite, Course 121 or its equivalent. Lectures, T Th 11. Warren 45. Laboratory, T or W 2-4. Warren 260. Assistant Professor GOODRICH.

Consideration of corporation and partnership accounting; manufacturing cost systems; tax, inventory, depreciation, and price level problems as they affect income determination; preparation and interpretation of financial statement data. Emphasis is placed on special problems of agricultural business.

240. (140.) *MARKETING*. Fall or spring term. Credit three hours. Lectures, M W F 11 except for weeks when field trips are taken, then M F lectures only. Warren 45. Field trips, T W or Th 1-5:30. Professor DARRAH.

A study of how farm products are marketed. Special attention is given to the consumption of farm products, factors that affect consumption, market channels, operation of different marketing agencies, storage, transportation, packaging, product identification, advertising and promotion, buying, selling, and costs. One all-day and two half-day trips are taken to visit marketing agencies.

302. (102.) *FARM MANAGEMENT*. Spring term. Credit five hours. Not open to first-year students. Lectures, M W F 10. Warren 45. Laboratory, T W Th or F 2-4. Warren 101. On days when farms are visited, the laboratory period is 1:30-5:30. Professor WARREN.

A study of the organization and operation of the farm from the point of view of efficiency and continuous profit; farm records, farm business analysis, factors affecting profits, size of business, choice of enterprises, partnership arrangements, getting started in farming, planning the organization and management of specific farms. One all-day trip and five half-day trips are taken to visit farms in nearby regions.

326. (126.) *FARMERS' COOPERATIVES*. Spring term. Credit three hours. Lectures, M W 9. Warren 45. Discussion, W or Th 2-4. Warren 145. Associate Professor CARPENTER.

What cooperatives are, what they have tried to do, and what they have done; their legal status and special problems of organization, finance, and control.

330. (130.) *RURAL GOVERNMENT*. Fall term. Credit three hours. Lectures, T Th 9. Warren 145. Discussion period, T or Th 2-4. Warren 31. Professor LUTZ.

Government in the United States with emphasis upon examination, analysis, and resolution of public issues confronting leadership in open-country areas of New York. Government organization, administration, functions, and finance are discussed in this context.

346. (143.) *PRICING AND DISTRIBUTION OF MARKET MILK*. Fall term. Credit three hours. Lectures, M F 11. Warren 345. Discussion period, F 2-4. Warren 260. Professor STORY.

A study of the marketing system for milk and how it is changing. Also a study of methods and principles of pricing milk, with special attention to federal and state milk orders.

347. (147.) *MARKETING INSTITUTIONS*. Spring term. Credit two hours. Enrollment limited to 40. M 12. Warren 245. Professor DOMINICK.

Economic functions performed by various types of specialized marketing agencies, with an emphasis on their physical operating patterns. Five days of spring vacation are spent in New York City inspecting and studying the major terminal marketing institutions. Total cost of the trip need not exceed \$50 in addition to transportation to and from New York.

## AGRICULTURAL ENGINEERING

104. (1.) *ELEMENTS OF AGRICULTURAL ENGINEERING*. Fall or spring term. Credit three hours. Lectures, T Th 10. Recitation period, F 11 or 12. Riley-Robb 125. Laboratory, M T W Th or F 2-4:30. Riley-Robb 160. Fall term, Assistant Professor REHUGLER; spring term, Assistant Professor LUDINGTON.

An introductory course covering basic principles of farm structures, electric power and processing, soil and water conservation, and power and machinery. Some of the topics included are farm wiring, electric motors, elementary statics and structural design, refrigeration, water pumps and systems, internal combustion engines, machinery, and soil and water engineering problems. Emphasis is placed upon the application of basic physical principles to the solution of agricultural engineering problems.

106. (4.) *MECHANICAL DRAWING*. Fall or spring term. Credit three hours. Lectures, T Th 8. Riley-Robb 105. Laboratory; Fall term, W or Th 1:40-4:30; spring term, W 1:40-4:30. Riley-Robb 425. Limited to 40 students per laboratory. Book and supply lists are available at the book stores. Mr. LONGHOUSE.

Graphic presentation, including lettering, use of instruments; orthographic projection of multiview drawings including sections, auxiliaries, plans and elevations; pictorial drawing, graphs and charts; elementary descriptive geometry; and the practical applications of these principles to simple problems. Both machine drawing and architectural drawing conventions and practices are discussed and employed in the solution of drawing problems.

204. (10.) *WOODWORKING AND CARPENTRY*. Spring term. Credit two hours. Lecture, T 9. Riley-Robb 125. Laboratory, M T or Th 1:40-4:30 or Th 8-10:50. Riley-Robb 70. Limited to 20 students per section. Assistant Professor LECHNER.

Designed to acquaint the student with the common woodworking, carpentry, concrete, tool-fitting, and wood-finishing jobs common to the farm and home. The skill in use of both hand and power tools is emphasized in the construction and repair of farm equipment. A field trip is included to a local woodworking plant and sawmill.

205. (42.) *FARM METAL WORK*. Fall or spring term. Credit two hours. Lecture, Th 9. Riley-Robb 125. Laboratory, including metal lathe work, M 1:40-4:30. Laboratory, not including metal lathe work, T 8-10:50, or T or Th 1:40-4:30. Riley-Robb 60 and 64. Limited to 20 students per laboratory section. Assistant Professor LECHNER and Mr. MAYNARD.

Instruction and practice in the fundamentals of electric arc welding, oxyacetylene welding, sheet metal work, pipe fitting, hot and cold metal work, and metal lathe work as they apply to farm shop work for both repair and construction jobs.

233. (31.) *FARM STRUCTURES*. Fall term. Credit three hours. Prerequisites, intermediate algebra and physics. Lectures, M W F 8. Riley-Robb 105. Assistant Professor LORENZEN.

A study of the facilities and equipment for livestock production and crop storage, with emphasis on farm buildings from the viewpoint of structural design, environment, and materials handling.

305. (43.) *ADVANCED FARM METAL WORK*. Fall or spring term. Credit one or two hours. Prerequisite, Course 205, its equivalent, or permission of instructor. Laboratory for one credit, F 1:40-4:00; for two credits, one additional 2½-hour laboratory to be arranged. Riley-Robb 60 and 64. Assistant Professor LECHNER and Mr. MAYNARD.

Machine shop practice is offered in fall term. Advanced welding only, or welding together with metal construction or redesign project is offered in spring term.

311. (103.) *FARM MACHINERY*. Spring term. Credit two hours. Not open to first-year students. Lectures, T Th 11. Riley-Robb 125. One recitation each week to be arranged Friday a.m. Riley-Robb 225. Associate Professor MILLER.

A study of the operating principles, use, selection, and methods of estimating costs of owning and operating farm machinery and equipment. Machines in each of the following groups are included: tillage, seeding, fertilizer application, pest control, harvesting, processing, and crop handling.

312. (102.) *FARM POWER*. Fall term. Credit three hours. Prerequisite, Course 104. Lectures, T Th 11. Riley-Robb 125. Laboratory, M T W or Th 2-4:30. Riley-Robb 74. Assistant Professor REIKUGLER.

A study of the principles of operation and adjustment of internal combustion engines and their farm applications. Principal emphasis on farm tractors, including care and operation, power transmission, power requirements, and economic factors.

## AGRONOMY

111. (11.) *PRODUCTION OF FIELD CROPS*. Spring term. Credit four hours. Lectures, M W F 10. Caldwell 100. Laboratory, T W Th or F 2-4:30. Caldwell 250. Professor HARTWIG.

Deals principally with the crops that are used for feeding livestock and poultry. Emphasis is placed on the hay, silage, pasture, and grain crops of the United States. Cultural methods, management, crop rotations, lime and fertilizer practices, soil and climatic adaptations, and the fundamental principles of species and varietal recognition are considered. Two outdoor practicums involving study in a very extensive crop garden will be held during regular laboratory periods.

200. (1.) *NATURE AND PROPERTIES OF SOILS*. Fall term. Credit four hours. Lectures, M W F 9. Caldwell 100. Laboratory, M T W Th or F 2-4:30, or T or Th 10-12:30. Professor LATHWELL.

A comprehensive introduction to the field of soil science with emphasis on scientific principles and their application in solutions of practical soil management problems.

312. (112.) *FEED CROPS*. Spring term. Credit four hours. Prerequisite, an introductory course in crop production. A course in livestock feeding is desirable but not essential preparation. Lectures, M W F 8. Discussion, F 11 or 12. Warren 345. Associate Professor M. J. WRIGHT.

The production of field crops with reference to their value for livestock in terms of energy, protein, and other nutritional components per unit of land utilized. Consideration will be given to establishment, management, harvesting, and preservation practices

that influence yield and nutritive value. Forage grasses, forage legumes, and corn will be emphasized.

## ANIMAL HUSBANDRY

100. (1.) *INTRODUCTORY ANIMAL SCIENCE*. Fall term. Credit three hours. Lectures, W F 10. Morrison 146. Laboratory, T Th or F 2-4:30, W 11-1. Livestock Pavilion. Assistant Professor J. M. ELLIOT.

Designed to acquaint the beginning student with the development, scope, economic importance, problems, and language of the livestock industry. All commercially important classes of farm animals are considered, with emphasis on dairy cattle, beef cattle, sheep, and swine. The place of the biological sciences in a rapidly changing animal agriculture is stressed. The intent of the course is to give insight into opportunities in the field and to serve as an introduction to subsequent specialized courses.

112. (10.) *LIVESTOCK FEEDING*. Fall or spring term. Credit four hours. Lectures: fall term, M W F 11; spring term, M W F 9. Morrison 146. Laboratory: fall term, Th or F 2-4:30; spring term, M W Th or F 2-4:30. Morrison 164. Fall term: Associate Professor WARNER; spring term: Professor S. E. SMITH.

The feeding of farm animals, including the general basic principles, feeding standards, the computation of rations, and the composition and nutritive value of livestock feeds.

220. (20.) *ANIMAL BREEDING*. Fall term. Credit three hours. Lectures, T Th 9. Morrison 146. Recitation, demonstration, and laboratory, M T W Th or F 2-4:30. Morrison 174. Professor FOOTE.

An introduction to the anatomy and physiology of reproduction and the genetics of farm animals, and improvement of livestock through the integrated application of this knowledge. Laboratory material to give the student a first-hand knowledge of reproductive processes, and equipment for studying problems in livestock improvement are provided.

*HEALTH AND DISEASES OF ANIMALS*. (Veterinary 261 (61.)) Spring term. Credit three hours. Not open to first-year students or to those who have had no course in animal husbandry. Lectures, M W F 11. Veterinary College. Room C 207. Dr. WAGNER and collaborators.

The causes and the nature of the common diseases of livestock are discussed. Emphasis is placed on the prevention and control of animal diseases.

241. (41.) *APPLIED LIVESTOCK SELECTION*: Beef Cattle, Sheep, and Swine. Fall term. Credit two hours. Lecture and laboratory period, W 1:40-4:30. Livestock Pavilion and Barns. Professor J. I. MILLER.

The application of the various methods used in determining utility value of market and breeding classes of meat animals. Visual appraisal, carcass data, breeding records, and performance tests are considered.

250. (50.) *DAIRY CATTLE*. Fall or spring term. Credit three hours. Lectures: fall term, T Th 8; spring term, T Th 10. Morrison 146. Laboratory, M or Th 2-4:30. Fall term, Morrison 163 and Livestock Pavilion. Spring term, Morrison 174 and Livestock Pavilion. It is preferred that two-year students register for this course in the spring term. Assistant Professor MERRILL.

Some of the economic aspects of the dairy industry; study of dairy breeds; factors in breeding and development of dairy cattle; milking methods and milk-production problems; efficient feeding; and care, management, and health of the dairy herd. Practice in selection, herd management, formulating of rations, planning of breeding programs, and keeping of records.

251. (51.) *DAIRY-CATTLE SELECTION AND TYPE EVALUATION*. Spring term. Credit three hours. Practice, W 2-4:30 and S 10-12:30. Livestock Pavilion. Professor TRIMBERGER.

A beginning course in the selection and judging of all breeds of dairy cattle. Practice includes all-day trips on Saturday, during the latter part of the term, to herds in the state.

260. (60.) *BEEF CATTLE*. Spring term. Credit three hours. Lectures, T Th 10. Morrison 163. Laboratory, F 2-4:30. Livestock Pavilion and Beef Cattle Barn. Professor J. I. MILLER.

A general course in beef-cattle production. The management, feeding, breeding, selection, and marketing problems involved in the beef-cattle enterprise are emphasized. A one-day field trip is taken to study successful beef-production methods.

270. (70.) *SWINE*. Spring term. Credit three hours. Lectures, T Th 9. Morrison 163. Laboratory, T 2-4:30. Morrison 38 and Swine Barn. Associate Professor POND.

A general course in swine production. The application of nutritional and genetic principles to practical swine management are stressed, and practical exercises are included. A one-day field trip is taken.

280. (80.) *SHEEP*. Fall term. Credit three hours. Lectures, T Th 10. Morrison 163. Laboratory, M 2-4:30. Morrison 164 and Sheep Barn. Associate Professor HOGUE.

A general course in the care, breeding, feeding, management, and selection of sheep. Lectures and laboratory periods designed to give the student a practical knowledge of sheep production as well as some scientific background for improved practices in sheep production.

290. (90.) *MEAT AND MEAT PRODUCTS*. Fall or spring term. Credit three hours. Lecture, T 8. Morrison 82. Laboratory, M W or T Th 2-4:30. Morrison 63. It is requested that two-year students register in the Tuesday laboratory section. Registration limited to sixteen students in each section. Associate Professor STOFFER.

Livestock slaughtering, retail meat cutting, live animal-carcass relationships, and the storage and preservation of meat and meat products. A one-day field trip to packing plants will be taken.

350. (150.) *ADVANCED DAIRY CATTLE PRODUCTION*. Spring term. Credit three hours. Lectures, T Th 11. Morrison 163. Laboratory and discussion, T 2-4:30. Morrison 164. Professor TRIMBERGER.

Analysis of breeding and management programs in successful herds. Evaluation of the programs of dairy-cattle breed associations, artificial insemination cooperatives, and herd improvement organizations. Emphasis is placed on the application of the principles of dairy breeding, feeding, and management to the development and operation of a successful dairy farm.

## BACTERIOLOGY

103. (3.) *AGRICULTURAL AND HOME ECONOMICS BACTERIOLOGY*. Spring term. Credit three hours. Not recommended for first-year students. Not accepted as pre-

requisite for advanced courses, except with special permission from the instructor. Bacteriology 105 must be taken with Bacteriology 103. Lectures, M W F 11. Caldwell 100. Professor VANDEMARK.

The basic principles of bacteriology and their application in agriculture, home economics, industry, and public health.

105. (5.) *AGRICULTURAL AND HOME ECONOMICS BACTERIOLOGY LABORATORY*. Spring term. Credit one hour. Must be taken simultaneously with Bacteriology 103. One laboratory period a week. T 8-9:50 or 11-12:50, or W or Th 2-3:50. Stocking 321. Professor VANDEMARK and assistants.

General laboratory techniques as applied in agriculture and household bacteriology.

## BIOCHEMISTRY

100. (2.) *INTRODUCTORY AGRICULTURAL CHEMISTRY*. Fall term. Credit five hours. Lectures and recitations, M T W Th F 11. Savage 100. Associate Professor NEAL and assistants.

Lectures, demonstrations, and recitations dealing with the fundamental principles of chemistry and their application to agricultural practices. This course is not accepted as a prerequisite for further courses in chemistry or biochemistry.

## BIOLOGY

101-102. (1-2.) *GENERAL BIOLOGY*. Fall and spring terms. Credit three hours a term. Biology 101 with a grade of 50 or higher is prerequisite to Biology 102, unless special permission is obtained from the instructor. Not open to students who have taken both Zoology 103-104 (or 101-102) and Botany 101-102. If Biology 101-102 is taken after Zoology 103-104 (or 101-102) or Botany 101-102, credit two hours a term. Lectures, M W 8, Ives 120, or M W 10, Warren 231; or M W 11, Plant Science 233. Laboratory, M T W Th or F 2-4:30, or Th F or S 8-10:30, or T Th or F 10-12:30, or S 9-11:30, or W 7-9:30. Roberts 392 or 304. Assistant Professor HALL and Mr. MUNDINGER, and assistants.

Designed to acquaint students majoring within or outside the animal and plant sciences with the established principles of biology, and with the body of research that led to the formulation of these principles. Specifically, the topics are the organization, integration, and maintenance of living organisms, and their reproduction, heredity, behavior, and interactions. Emphasis is placed on an understanding of each topic in the light of modern evolutionary theory.

## BOTANY

101-102. (1-2.) *INTRODUCTORY BOTANY*. Fall and spring terms. Credit three hours a term. Lectures, T Th 9 or 11. Plant Science 233. One laboratory period a week, M T W Th or F 2-4:30, T 10-12:30, S 8-10:30, or 9-11:30. Plant Science 240, 242, and 262. Professor BANKS and assistants.

Designed to give general students an understanding of the growth and evolution of plants and their role in nature. It provides the basic knowledge necessary for those who intend to specialize in some aspect of plant science.

Botany 101 is devoted to a study of growth in the flowering plants, with emphasis placed on structure, function, and reproduction. Botany 102 is concerned with the phyla of plants, with representative life cycles, and with a consideration of the importance of various groups in the study of biological principles. The study of the evolution of the groups of plants is based on genetical and environmental mechanisms that control it. The classification and ecology of plants is introduced in several laboratory periods spent in the field. The scientific process, the growth of botanical knowledge, botanical principles, and, particularly, the necessity of changing interpretations as new information is acquired are introduced throughout the course.

235. (31.) *PLANT PHYSIOLOGY*. Fall or spring term. Credit four hours. Lectures, T Th 10, Plant Science 143. Laboratory, T Th or W F 2-4:30, or M 2-4:30 and S 8-10:30. Plant Science 227. Professor ———.

Designed to acquaint the student with the general principles of plant physiology. Topics such as water relations, photosynthesis, translocation, digestion, respiration, mineral nutrition, growth, and reproduction are studied in detail. Particular emphasis is placed, both in laboratory and classroom, on the discussion of principles and their application to plants.

## DRAWING

109-110. (9-10.) *DRAWING FOR LANDSCAPE STUDENTS*. Throughout the year. Credit three hours a term. Credit may not be received for both Course 109 and Course 111. Fall term is prerequisite to spring term. Fall term, W F 2-4:30; spring term, M W F 11-12:50. Mann 500. Assistant Professors A. M. ELLIOT and LAMBERT.

Planned to develop practical ability in the sketching of outdoor planting and landscaped features, facility in lettering, and knowledge of isometric and perspective construction from plans and elevations. Sketch-book assignments, to be done outside class, will be given throughout the year.

111. (11.) *FREEHAND DRAWING*. Fall or spring term. Credit three hours. Credit may not be received for both Course 109 and Course 111. For beginning students. Lecture, T or W 10. Six hours of time, including the lecture period, are to be spent in the drawing room, preferably in two-hour units. These hours must be scheduled between 9 and 11 M W F or T 2-4 in the fall term, and between 9 and 12, M T W Th F, or T 2-4, in the spring term. Mann 500. Assistant Professors A. M. ELLIOT and LAMBERT.

The objective is to develop accuracy of observation and skill in delineation. Practice is given in outdoor sketching and in the drawing of still-life set-ups, interior scenes, and human figures. The principles of free-hand perspective are taught and applied. The course is designed to aid those who plan to work in nature study, biological sciences, and home economics. Sketch-book assignments to be done outside class are given throughout the year.

## ENTOMOLOGY

210. (10.) *INTRODUCTORY ENTOMOLOGY*. Fall or spring term. Credit three hours. Lectures: fall term, W F 11; spring term, T Th 9. Comstock 245. Laboratory: fall term, W Th or F 2-4:30; spring term, M T W Th or F 2-4:30. Comstock 100. Associate Professor RAFFENSPERGER and assistants.

A survey of the structure, biology, and classification of insects; an introduction to the

study of insects as a major segment of the biological community. Laboratory exercises in the anatomy and biology of insects, and practice in the techniques of insect identification.

260. (61.) *INTRODUCTORY BEEKEEPING*. Spring term. Credit two hours. Lectures, T Th 11. Comstock 245. Professor DYCE and Associate Professor MORSE.

Intended to afford a general knowledge of the fundamentals of beekeeping, including the life history, instincts, and general behavior of honeybees. Special attention is given to the role of bees in the cross-pollination of agricultural crops, as well as production of honey and beeswax.

## EXTENSION TEACHING

100. (1.) *ORAL AND WRITTEN EXPRESSION*. Throughout the year. Credit three hours a term. Fall term is prerequisite to spring term. Lectures and practice: fall term, M W F 8 or 9 or T Th S 10; spring term, M W F 8, 9, or 11. Warren 231. Criticism by appointment, daily 8-5, and S 8-1. Associate Professors FREEMAN and MARTIN, and Messrs. LUEDER and SPENCER.

Practice in oral and written presentation of topics in agriculture and other fields, with criticism and individual appointments on the technique of public speech. Designed to encourage interest in public affairs, and, through demonstrations and the use of graphic materials and other forms, to train for effective self-expression in public. Special training is given to competitors for the Eastman Prizes for Public Speaking. In addition, some study is made of representative work in English literature. Part of the work in the second term is a study of parliamentary practice.

## FLORICULTURE AND ORNAMENTAL HORTICULTURE

101. (1.) *GENERAL FLORICULTURE AND ORNAMENTAL HORTICULTURE*. Fall term. Credit three hours. Lectures, M W 8. Plant Science 141. Laboratory, M or T 2-4:30. Plant Science 15. Associate Professor LANGHANS.

An elementary course covering the principles and practices of growing ornamental plants in the garden, greenhouse, and home.

102. (2.) *INTRODUCTION TO LANDSCAPE DESIGN*. Fall or spring term. Credit three hours. Lectures, M W F 9. East Roberts 222. Mr. DWELLE.

A consideration of the principles of landscape design as applied to the small-residence property.

103. (3.) *ELEMENTARY LANDSCAPE DESIGN*. Fall term. Credit three hours. Lectures, T Th 11. Laboratory, Th 2-4:30. Plant Science 433. Assistant Professor SCANNELL.

Principles of design, with practice in the use of drawing instruments and graphic interpretation of ideas.

105. (5.) *PRINCIPLES OF FLOWER ARRANGEMENT*. Fall or spring term. Credit two hours. Enrollment limited to 18 students for each laboratory section. Fall term: Lecture, Th 9, Plant Science 37; laboratory, W or Th 2-4:30, or Th 10-12:30, Plant Science 22. Spring term: Lecture, T 10, Plant Science 37; laboratory, W 2-4:30, or Th 2-4:30, Plant Science 22. Associate Professor FOX.

A study of the care and handling of flowers, the factors affecting keeping quality, and the design principles involved in the use of flowers and related decorative materials.

210. (10.) *TAXONOMY OF CULTIVATED PLANTS*. Fall term. Credit four hours. Lectures, W F 10. Plant Science 37. Laboratory, W F 2-4:30. Plant Science 29, Assistant Professor INGRAM.

A study of the kinds of cultivated ferns and seed plants and their classification into families and genera. Emphasis is placed on methods of identification, the preparation and use of the analytical keys, the distinguishing characteristics of the families concerned and their importance in ornamental horticulture.

213. (13.) *WOODY-PLANT MATERIALS*. Spring term. Credit four hours. Lectures, T Th 9. Plant Science 37. Laboratory and field trips, M and W or F 2-4:30. Plant Science 29. Assistant Professor MOWER.

A study of the trees, shrubs, and vines used in landscape planting. Emphasis is placed on their characteristics and values for use as landscape material. The class visits Rochester parks.

232. (32.) *INTERMEDIATE LANDSCAPE DESIGN*. Spring term. Credit three hours. Lecture, M 11. Laboratory, T Th 10-12:30. Plant Science 433. Mr. DWELLE.

The application of the principles of design to the specific problems of the small residential property. A terminal course for those not intending to major in this field.

314. (14.) *TURFGRASS MANAGEMENT*. Spring term. Credit two hours. Prerequisite, Agronomy 200 or permission to register. Lecture, W 11. Plant Science 37. Laboratory, Th 2-4:30. Plant Science 29. Professor CORNMAN.

The principles, practices, and materials for the construction and maintenance of lawn areas. Some attention is given sports turf. A week-end inspection trip is taken to experimental test plots and special turf areas.

325. (125.) *FLOWER-STORE MANAGEMENT*. Spring term. Credit three hours. Prerequisite, Course 105, and permission to register. Lecture, T Th 8. Plant Science 143. Laboratory, T 2-4:30. Plant Science 22. Associate Professor FOX.

Lectures devoted to flower-shop management, business methods, merchandising, and marketing of floricultural commodities. Laboratories to include the application of subject matter and the principles of commercial floral arrangement and design. A required two-day field trip is made to flower shows, and to wholesale and retail florist establishments.

## PLANT PATHOLOGY

301. (1.) *ELEMENTARY PLANT PATHOLOGY*. Fall or spring term. Credit three hours. Lecture, Th 11. Recitation, T 11. Plant Science 37. Laboratory, T W Th or F 2-4:30. Plant Science 341 and 343. Conferences to be arranged. Professor BOOTHROYD.

An introductory course dealing with the nature, cause, and control of disease in plants. Representative diseases of cultivated crops are studied in the laboratory.

## POMOLOGY

101. (1.) *TREE FRUITS*. Fall term. Credit three hours. Should be preceded or accompanied by an elementary course in botany. Lectures, T Th 8. Warren 131. Laboratory, W 2-4:30. Plant Science 107. Professor EDGERTON.

A study of the general principles and practices of tree-fruit culture and their relation to the underlying sciences. Topics to be covered include propagation, varieties, orchard management, and growth and fruiting habits. Practical work is presented in grafting, pruning, site and soil selection, and planting.

102. (2.) *SMALL FRUITS*. Fall term. Credit three hours. Should be preceded or accompanied by an elementary course in botany. Lectures, M W 8. Plant Science 143. Laboratory, M 2-4:30. Plant Science 107. Associate Professor TOMKINS.

A study of the general principles and practices in the culture of grapes, strawberries, brambles, and bush fruits, and their relation to the underlying sciences. Fruiting and growth habits are covered, with practical work in pruning, planting, and propagation. One or two Saturday field trips will be taken.

201. (11.) *POST-HARVEST PHYSIOLOGY, HANDLING, AND STORAGE OF FRUITS*. Fall term. Credit three hours. Prerequisite, Course 101 or 102. Lectures, T Th 8. Plant Science 143. Laboratory, F 2-4:30. Plant Science 107. Professor SMOCK.

The chemistry and physiology of fruits as they affect quality and marketability are studied. Handling methods, maturity indices, and storage practices are considered. Practical work involves grading and inspection of fruits and storage of fruit in different ways. One Saturday field trip is required.

202. (112.) *ADVANCED LABORATORY COURSE*. Spring term. Credit two hours. S 8-12. Plant Science 107. Professors HOFFMAN and EDGERTON.

This course is designed to give more extended practice in the various orchard operations than can be given in Course 101. Special attention is given to problems of pruning, grafting, orchard-soil selection and management, pollination, and spray practices. One or two field trips extending into the afternoon are made.

[301. (121.) *ECONOMIC FRUITS OF THE WORLD*. Spring term. Credit three hours. Given in alternate years. Professor SMOCK.] Not given in 1964-1965.

## POULTRY HUSBANDRY

100. (1.) *INTRODUCTION TO POULTRY SCIENCE*. Fall term. Credit three hours. Lectures, M W F 8. One recitation period, to be arranged. Rice 300. Professor BAKER, assisted by other members of the staff.

[121. (20.) *BIOLOGY OF THE FOWL*. Fall term. Credit three hours. Given in alternate years. Professor MARBLE.] Not given in 1964-1965.

151. (50.) *MARKET EGGS AND POULTRY*. Fall term. Credit two hours. Given in alternate years. Lectures, T 11. Laboratory T 2. Rice 101. Professor BAKER.

A detailed study of the interior and exterior qualities of eggs, abnormalities, egg grades, and standards; practice in candling, grading, and packing. Grades and standards of market poultry; killing, dressing, and packing. General market information. Two field trips are taken.

280. (80.) *POULTRY FARM MANAGEMENT*. Spring term. Credit three hours. Given in alternate years. Lectures, T Th 10. Laboratory, W 2. Rice 101. Professor MARBLE.

Management of the hatchery, young stock and laying flock. Practical management problems of the hatcheryman and commercial poultryman will be studied. A two-day field trip is taken.

310. (110.) *POULTRY NUTRITION*. Spring term. Credit three hours. Lectures, M W F 8. Rice 300. Assistant Professor NESHEIM.

The principles of poultry nutrition and their application to poultry feeding and feed manufacturing.

## RURAL EDUCATION

110. (10.) *PSYCHOLOGY*. Fall or spring term. Credit three hours. Lectures, M W 10. Plant Science 233. Discussion sections, Th 8, 9, 10, or 11, or F 8, 9, 10, 11, or 12. Assistant Professor MINK.

A study of topics in psychology such as learning, perception, motivation, emotion, individual differences, and personal-social relationships.

*COLLEGE READING AND STUDY SKILLS PROGRAM*. (Education 7.) Fall or spring term. Noncredit. Lecture and discussion, M W 10 or 12 or T Th 9 or 10. Laboratory, two half-hour periods a week to be arranged. Spring program is open to all registered students. Enrollment limited. Room to be announced. Assistant Professor PAUK.

Designed to increase efficiency in reading rate and comprehension. Principles and techniques of good reading are explained, demonstrated, and practiced in class. The laboratory is equipped to provide an opportunity to practice good reading habits under controlled conditions.

## RURAL SOCIOLOGY

100. (1.) *GENERAL SOCIOLOGY*. Fall or spring term. Credit three hours. Lectures, M W 8. Warren 45. Discussion sections, Th 8, 9, 10, or 11 and F 8, 9, 10, or 11. Fall term, Assistant Professor CARROLL; spring term, Assistant Professor HARP.

A general introduction to the theory and methods of sociology. Major topics selected for discussion include culture, socialization, deviancy and social control, stratification, ideologies, and social change. Supplementary reading including recent research will be assigned for illustrative purposes and to assist students in analyzing topical areas as term projects.

210. (12.) *FOUNDATIONS FOR SOCIAL ACTION*. Spring term. Credit three hours. Not open to first-year students. M W F 10. Warren 345. Associate Professor REEDER.

The purpose is to provide the basic information essential to an understanding of social action and planned change. The course is designed for two categories of students: (1) students of various fields who wish to take one or two courses in sociology and who want to gain the kind of knowledge which relates directly to human relationships in their occupation and in their activities as organization members and citizens; (2) persons whose work or interests are likely to involve them in some phase of planned change—either as administrators, organization leaders, extension agents, teachers, or community development workers—and others for whom the role of change agent is an essential part of their job.

## VEGETABLE CROPS

103. (3.) *GENERAL HORTICULTURE*. Spring term. Credit four hours. Lectures, M W F 8. East Roberts 222. Laboratory, M W or F 2-4:30. East Roberts 301. Associate Professor SHIELDRAKE.

An introductory course in general horticulture, including flower, fruit, and vegetable growing. Intended primarily for students who want a general knowledge and for those who wish to specialize in some field of horticulture but have limited background, either in practical experience or in training in botany and agronomy.

211. (11.) *COMMERCIAL VEGETABLE CROPS*. Spring term. Credit four hours. Lectures, M W F 11. East Roberts 222. Laboratory, W or F 2-4:30. East Roberts 301. Professor SWEET.

Intended for the students who wish to specialize in commercial vegetable growing. A study of the general principles of vegetable growing. Consideration is also given to the economic importance, cultural requirements, marketing, and storage of important vegetables. Field trips are required.

212. (12.) *HANDLING AND MARKETING VEGETABLES*. Fall term. Credit three hours. Lectures, T Th 11. East Roberts 222. Laboratory, T or W 2-4:30. East Roberts 223. Professor HARTMAN.

(Students registered for the Tuesday laboratory are scheduled to go on a field trip at 9:30 a.m., Wednesday, the day on which classes officially begin at noon in the fall term.)

The handling of vegetables from harvest, whether for fresh market or processing, through the marketing channels to the consumer; personnel, facilities, machinery, and organization of the industry; quality measurement and grade standards; federal, state, and other regulations; principles and practices in precooling, storage, packaging, pre-packaging, other types of handling.

222. (22.) *POTATO PRODUCTION AND PROCESSING*. Spring term. Credit three hours. Lectures, T Th 10. East Roberts 222. Laboratory, T or W 2-4:30. East Roberts 223. Professor ORA SMITH.

General principles and practical phases of potato production, storage, and processing are discussed. Growth processes and soil and environmental factors are emphasized as influencing production. Topics such as storage methods, grading, packaging, cooking quality, nutritive value, processing, and industrial uses of potatoes also are studied. Two field trips, one of which is all day, are taken to potato farms and processing plants.

## CORNELL UNIVERSITY ANNOUNCEMENTS

The Cornell Announcements are designed to give prospective students and others information about the University. The prospective student should have a copy of *General Information*; after consulting that, he may wish to write for one or more of the following Announcements:

*New York State College of Agriculture (Four-Year Course), New York State College of Agriculture (Two-Year Course), College of Architecture, College of Arts and Sciences, Department of Asian Studies, School of Education, New York State College of Home Economics, School of Hotel Administration, New York State School of Industrial and Labor Relations, Military Training, Summer School.*

*Announcements of the College of Engineering* may also be obtained. Please specify if the information is for a prospective student.

Undergraduate preparation in a recognized college or university is required for admission to the following Cornell divisions, for which Announcements are available: *Graduate School of Business and Public Administration, Law School, Medical College, Cornell University-New York Hospital School of Nursing, Graduate School of Nutrition, New York State Veterinary College, Graduate School.*

Requests for these publications may be addressed to
